Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Be'607 in view of Jafiee'697.

The applied Be'607 teaches that it is known in the art to make and use gypsum board comprising glass fibers and silane based sizing composition. See column 1, lines 25-37, column 2, lines 10-30, column 4, lines 19-50. The applied Be'607 does not specifically teach that particles may be a part of such composition. The applied Jafiee'697 teaches that it is known in the art to include particles in process of treating glass fibers prior to use in gypsum boards. See column 1, lines 5-25, column 2, lines 20-30, column 2, lines 60-67, column 5, lines 5-67, column 6, lines 1-5. It would have been obvious to one having ordinary skill in the art to add particles to Be'607 composition as suggested by Jafiee'697 since such would improve processability and mechanical properties of the gypsum board. Also, it would have been obvious to select particle

type for use in such composition since such would optimize water repellent properties of the board.

The amendments and remarks filed by applicants in December 21, 2005 have been fully considered. The claims, however, remain unpatentable in view of the above grounds of rejections. The examiner believes that the rejections are still proper and are maintained.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
